
Training Program in Translational Investigation

CTSI Training Curriculum Program Call for Applications!

Do you want to become a successful patient-oriented investigator who can bridge molecular medicine and clinical research? Do you hold a professional degree in Medicine, Dentistry, Nursing, or other clinical discipline, or are a PhD scientist highly committed to clinical investigation? Do you have an affiliation with UCLA, Harbor-UCLA, Cedars-Sinai Medical Center, or Charles R. Drew University of Medicine & Science?

If you answered yes to all of the above questions, the CTSI Training Curriculum Program in Clinical and Translational Investigation can offer you educational opportunities for advanced training in clinical research. These options vary from isolated clinical research development seminars (**Track 1**) to a formally structured certificate program (**Track 2**) and a Master of Science in Clinical Research (**Track 3**).

Track 1 does not grant any certificate or degree. The Clinical Research Development Seminars are open to interested fellows and faculty, and can be taken as individual entities. No tuition required. *Applications are accepted all year!*

Track 2 is a structured two-year part-time program that leads to a certificate awarded by the David Geffen School of Medicine at UCLA. No tuition required. *Applications are now being accepted until May 15, 2012!*

Track 3 is a Master of Science in Clinical Research (MSCR) graduate degree program offered by the Department of Biomathematics in the David Geffen School of Medicine at UCLA. The length of time to complete the MSCR degree, including the requirement of a research thesis, attracts those with career aspirations in academic medicine. Tuition required. *Applications are now being accepted until May 15, 2012!*
