Sign up soon for the May 1, 2020, IAS–USA course on the implications of new information on strategies for the clinical management of HIV prevention and treatment. An expert faculty of HIV/AIDS clinicians and researchers will present the information through a mix of didactic lectures and clinically relevant cases.

**PRESENTATIONS AND FACULTY**

- **Therapeutic HIV Vaccines**—Richard A. Koup, MD, Washington, DC
- **CROI 2020: CROI and Beyond**—Constance A. Benson, MD
- **Investigational Approaches to Antiretroviral Therapy**—Joseph J. Eron Jr, MD, University of North Carolina
- **Interactive Antiretroviral Therapy Case-Based Panel Discussion**—Monica Gandhi, MD, MPH, University of California San Francisco
- **Reconsidering the Approach to Managing Comorbidities in Older Adults With HIV Infection**—Kristine M. Erlandson, MD, MS, University of Colorado
- **Interactive Lunch Session on Stimulant, Alcohol, and Opioid Use**—Steven J. Shoptaw, PhD, University of California Los Angeles
- **The Data Free Zone: Tough Cases in HIV Prevention**—Raphael J. Landovitz, MD, MSc
- **Diagnosing and Treating Sexually Transmitted Infections**—Connie L. Celum, MD, MPH, University of Washington

**WHO SHOULD ATTEND**

This course is designed for physicians who are actively involved in the medical care of people with HIV infection and:

- Have a solid, working knowledge of HIV disease management
- Provide comprehensive or specialty care for patients with HIV infection
- Are currently active in HIV research

This activity is also relevant to nurse practitioners, registered nurses, physician assistants, registered pharmacists, and other health professionals.
