

Ending the HIV Epidemic: A Plan for America

John F. Moroney, MD, MPH – Regional Administrator
Office of Regional Operations – San Francisco, CA
Health Resources and Services Administration

"Ending the HIV Epidemic Priorities & Investments to Support Regional Coordination"
Convened by the UCLA Center for HIV Identification, Prevention and Treatment Services
January 24, 2020

Vision: Healthy Communities, Healthy People

Diagnose:

Diagnosing and Linking People with HIV to Effective Care

- **1.1 million Americans have HIV, and 1 in 7 don't know that they do**
- **HRSA-funded health centers are a key entry point for people with HIV who are undiagnosed**
 - Nearly two million patients receive HIV tests at health centers annually
- **HRSA's Health Center Program will increase HIV testing in high-impact areas by:**
 - Conducting expanded outreach with their communities
 - Increasing routine and risk-based HIV testing of health center patients

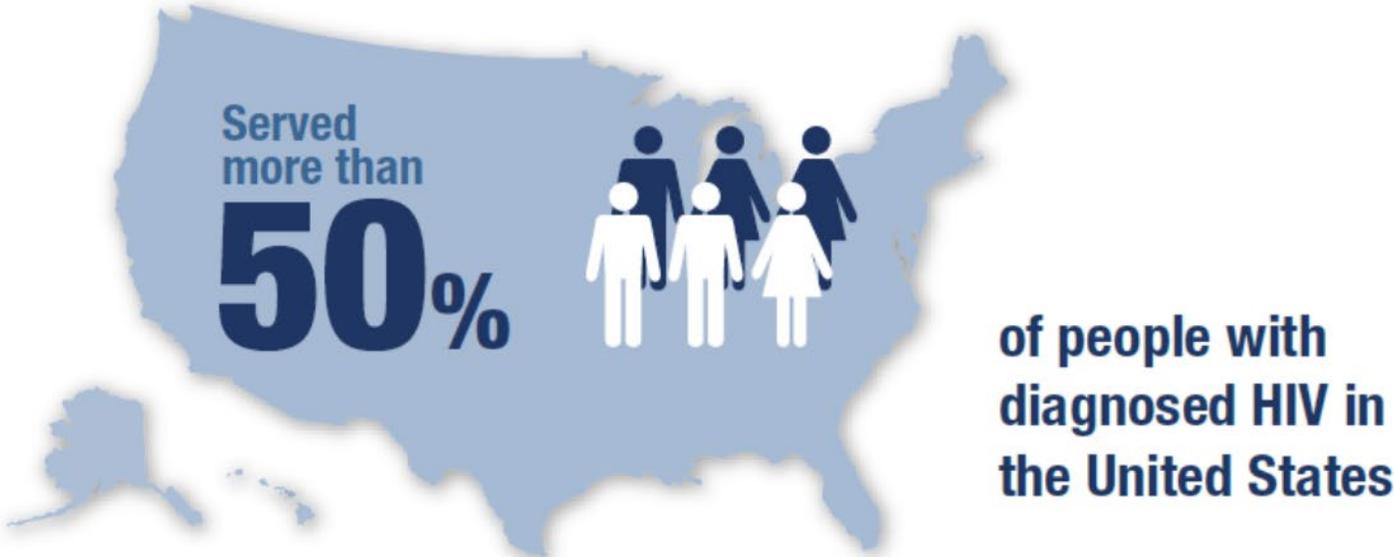

Treat: HIV Care and Treatment

- **HRSA lead role:**
 - Encourage initiation of rapid HIV care and treatment to reach viral suppression and stop transmission
 - Increase capacity by funding RWHAP Parts A and B in the identified jurisdictions
 - Provide workforce capacity development through the RWHAP Part F AIDS Education and Training Centers (AETC)
 - Provide technical assistance to the identified jurisdictions

Clients Served by the Ryan White HIV/AIDS Program (non-ADAP), 2018

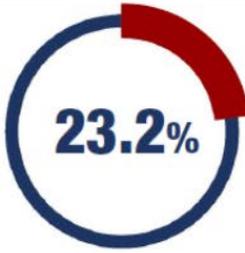

Served **533,758** clients in 2018

73.7% of clients were racial/ethnic minorities

of clients identified as **Black/African American**

of clients identified as **Hispanic/Latino**

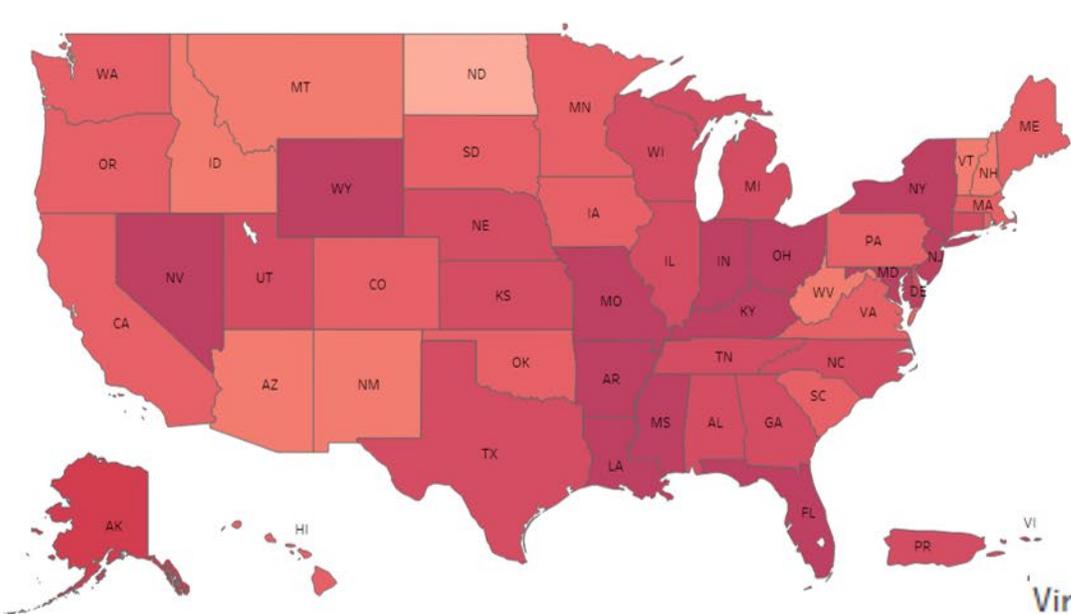

61.3% of clients were living at or below 100% of the Federal Poverty Level

46.1% of clients were aged 50 years and older

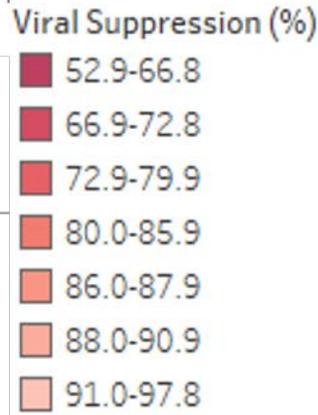

Source: HRSA Ryan White HIV/AIDS Program Service Report (RWR) 2018. Data is based on the 2018 Ryan White HIV/AIDS Program Service Report data.

Viral Suppression among RWHAP Clients, by State, 2010 and 2018— United States and 2 Territories^a

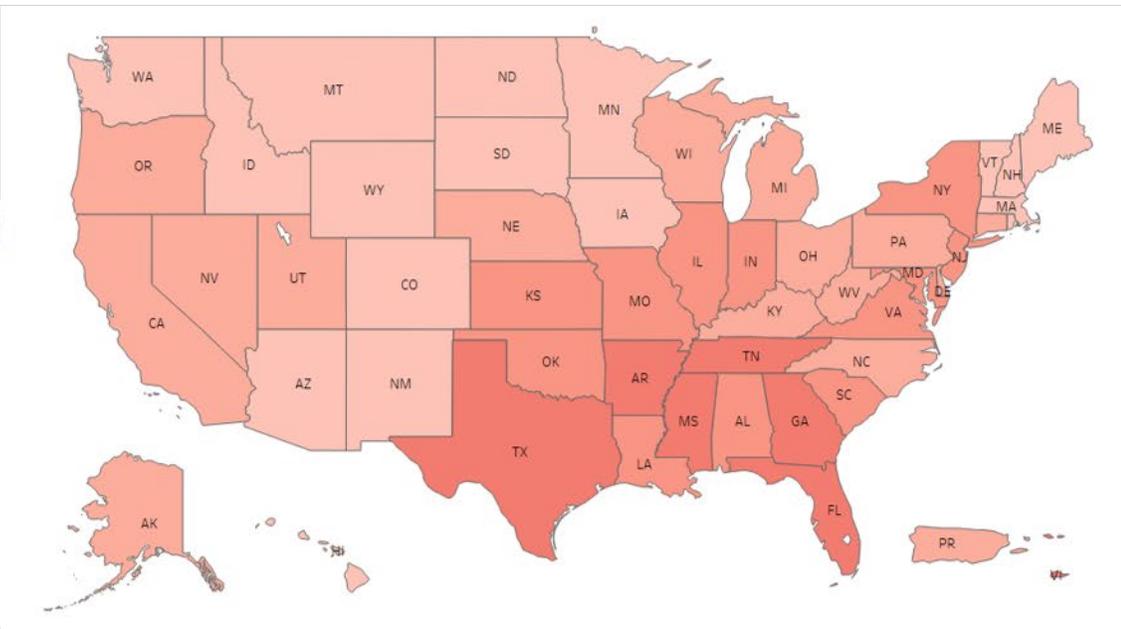

IN 2010

69.5%
VIRALLY SUPPRESSED

IN 2018

87.1%
VIRALLY SUPPRESSED

Viral suppression: ≥ 1 OAHS visit during the calendar year and ≥ 1 viral load reported, with the last viral load result < 200 copies/mL.
^a Puerto Rico and the U.S. Virgin Islands.

HRSA RWHAP: Meeting the Challenges Ahead

- Improve viral suppression and decrease disparities among patients who are in care
- Enhance linkage to and engagement in HIV care of the newly diagnosed
- Expand re-engagement and retention for those diagnosed but out of HIV care

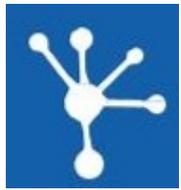

Prevent

- **Expand access to PrEP for HRSA-funded Health Center Program patients at highest risk of acquiring HIV**
 - Referrals from community-based programs
 - Focus on uninsured persons who are at high risk
- **HRSA-funded health centers will focus on:**
 - Expanding outreach, testing, care coordination, and access to PrEP to those populations at the greatest risk of acquiring HIV
- **HRSA HAB will focus on:**
 - Supporting workforce capacity training and clinical consultation for providers

Respond: HIV Data for Action

Detect developing clusters and outbreaks

Help people with HIV and those at risk to stay well

Focus resources on the people and areas that need them most

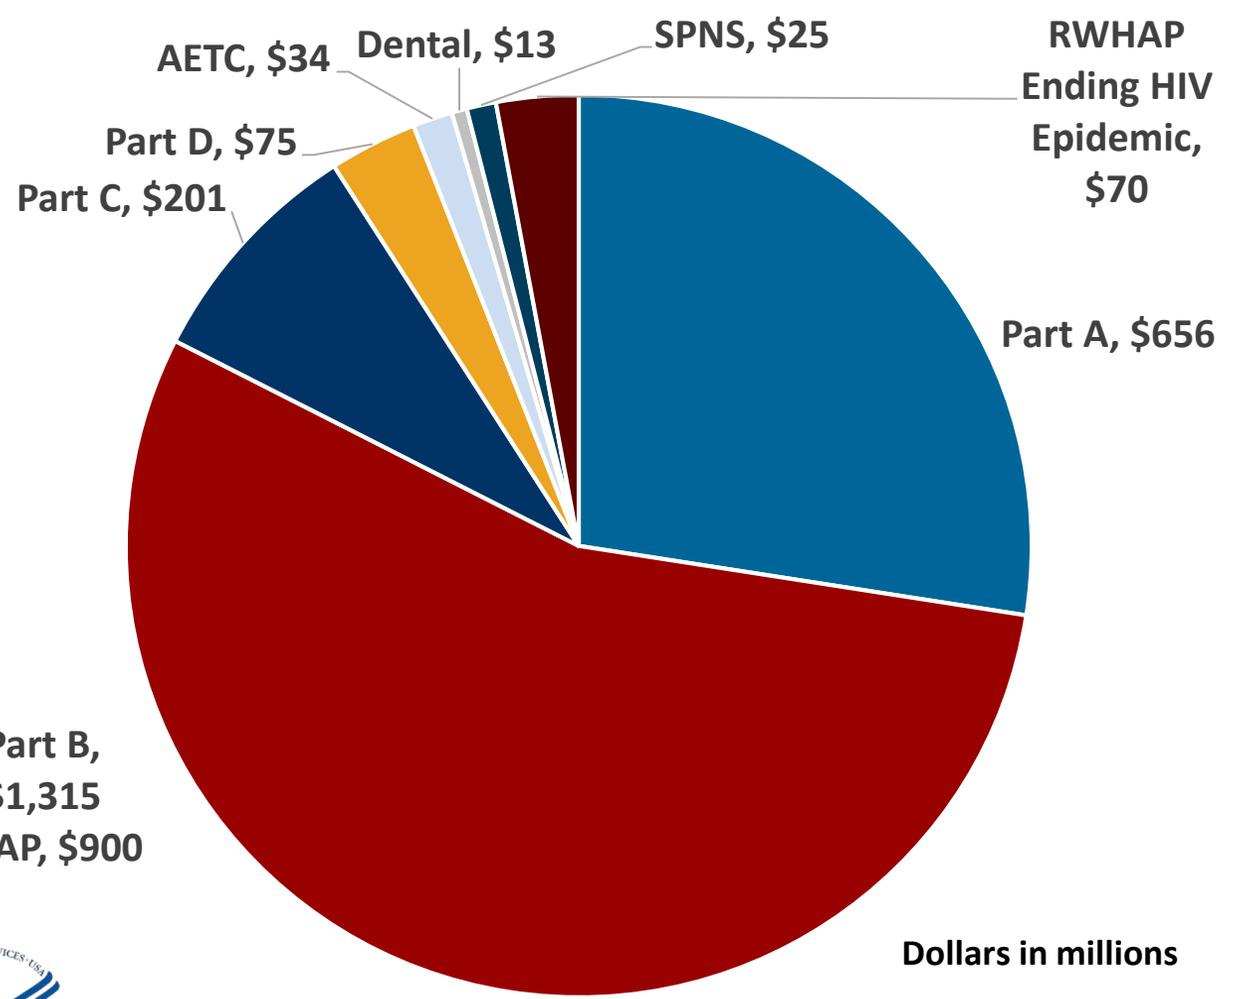

Funding and Next Steps

FY 2020 Ryan White HIV/AIDS Program Budget

- **\$70 million additional to augment the HIV/AIDS Bureau's efforts to support the EHE initiative**

Health Center Program Funding Overview

- **Primary Care HIV Prevention (PCHP) Supplemental Funding**

- \$50 million for HRSA-funded health centers in the identified geographic areas
- Eligible applicants: dually funded (BPHC and RWHAP) health centers or health centers with MOUs with RWHAP sites
- Released: October 16, 2019
- Expected Start Date: April 1, 2020

PCHP Objectives

Engage new and existing patients to identify those at risk for HIV	Increase patients tested for HIV	Increase patients who receive prevention education and clinically-indicated PrEP
Increase linkage to HIV treatment	Enhance/Establish partnerships to support HIV prevention activities	Within 8 months of award, add staff to support HIV prevention services and PrEP

Ending the HIV Epidemic: A Plan for America

Background

During the 2019 State of the Union address, the Trump administration announced the new "Ending the HIV Epidemic: A Plan for America." This will be a ten year initiative beginning in FY 2020 to achieve the important goal of reducing new HIV infections to less than 3,000 per year by 2030. Reducing new infections to this level would essentially mean that HIV transmissions would be rare and meet the definition of ending the epidemic. The initiative will focus efforts in 48 counties, Washington, DC, San Juan (PR), and seven states with substantial rural HIV burden.
