

The Behavioral Epidemiology Research Group in the Department of Epidemiology,
UCLA Fielding School of Public Health, invites you to attend

Lessons Learned from Epidemiologic Studies of Men Who Have Sex with Men in Atlanta

Eli Rosenberg, PhD

Assistant Professor, Department of Epidemiology
Emory University Rollins School of Public Health

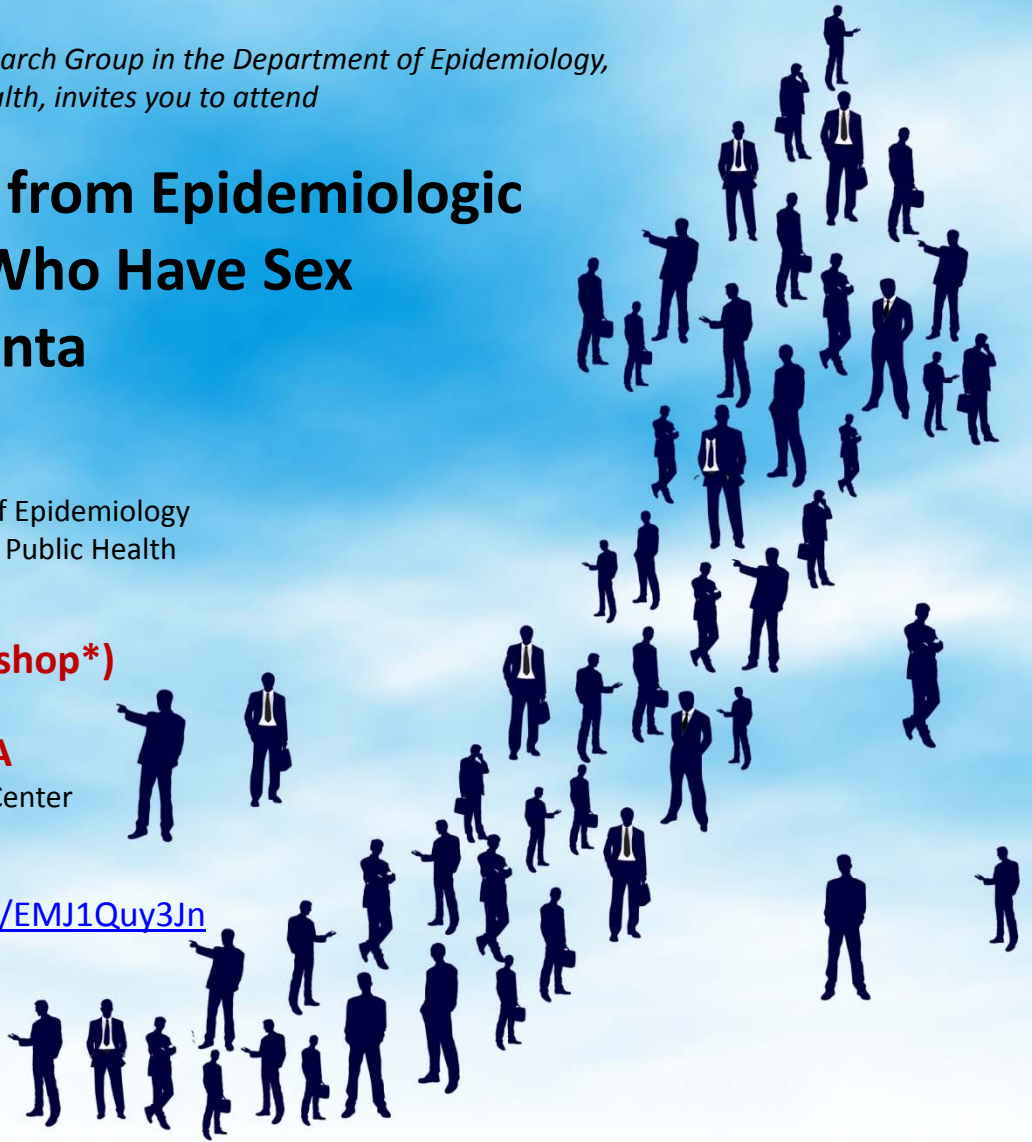

Friday, March 4, 2016
2:00pm to 3:00pm (workshop*)

Moss Auditorium at UCLA

A2-342 Marion Davies Children's Center
805 Tiverton Avenue, LA, 90095

RSVP at <http://goo.gl/forms/EMJ1Quy3Jn>

or call 310-794-0619, ext 246

*With webinar/remote participation option

Dr. Eli Rosenberg's research focuses on studies, methods, and analyses for understanding pertinent epidemiological issues in HIV prevention, such as the racial disparities in HIV infection among men who have sex with men (MSM) in the United States, how sexual networks shape transmission, the effects of STI and substance use on HIV acquisition, and the role of HIV care in reducing transmission. Specific methodological interests include surveillance methods, statistical and network modeling, causal inference methods, and development of software to support research studies.

This event is made possible by funds from the UCLA AIDS Institute, UCLA CFAR grant (AI028697). Additional support was provided by the Center for HIV Identification, Prevention, and Treatment Services (NIMH grant MH058107).
