Pull Up Neighbor

DESSIE BROWN, JR.
DIRECTOR OF MARKETING AND LOGISTICS

About Pull Up Neighbor

Our Mission is simple. We are a black owned community response team focused on the health and well-being of minorities and vulnerable communities. Our Goal is to provide immediate and direct assistance to communities in need across the country.

PUN IMPACT

Pull Up Neighbor has visited over 51 cities in an 8-month period to directly impact the underserved communities. During this period, we have been able to serve and give away the following:

Over 115,000 people served - Over 100,000 food boxes and fresh produce boxes

Over 100,000 individual meals - Over 500,000lbs of food and fresh produce

Over 200,000 hand sanitizers - Over 200,000 face masks

Over 75,000 Covid-19 essentials kits - Over 50,000 personal hygiene kits

Over 10,000 registered voters - Over 100,000 voters led to the polls - Over 5,000 driven to the polls

COVID-19 Vaccine Services and Resources

Pull Up Neighbor has partnered with Black Men Vote which now goes by Black Men Vax in order to provide information about the vaccine and how and where to get the vaccine in black and brown communities across the nation.

In Los Angeles we partnered with Kedren Health and the mayor's office to drive people to the location. On April 10th we had about 1000 people that came out to get vaccinated.

We used methods such as making it an event with a DJ and Food Trucks.

We also want to make it as easy as possible. You want to meet people where they are as well. If people don't have transportation, then try to partner with Uber or Lyft to get rides. Another option is mobile vaccination units

It's similar to voting. You can't make people vote or tell them who to vote for, but you can provide them with all the information that they need in order to make an informed decision.
