How to Move Your EHE Projects to the Next Stage of Research: A Consultation Session with NIH Program Officers
NIH initiatives for continued EHE-focused research: How to Move Your EHE Projects to the Next Stage of Research: A Consultation Session with NIH Program Officers

National EHE Meeting Session
April 16, 2024
Evolution in Funding Strategy

• NIH EHE funding initially through NIAID and NIMH Center mechanisms
• Coordinating Center, Consultative Hubs, and Supplements
• Beginning in FY24, funding opportunities available to all
• Expectations are for this approach to continue
• All ICs/program staff are your resources
For FY24 NIH released a new notice soliciting R-series grant applications

Smaller pilot projects through CFARs/ARCs

Larger, longer term independent awards

Notice of Special Interest (NOSI): Ending the HIV Epidemic (EHE)

Notice Number:
NOT-AI-23-070

NIAID Notice of Special Interest (NOSI): Resource-Related Research Project (R24) Applications to Support Collaborative Implementation Science to End the HIV Epidemic

**Purpose:** To solicit applications for Resource-Related Research Projects, including one Coordination, Consultation, and Data Management Center (CCDMC) and multiple Regional Consultation Hubs (RCHs), that will support ongoing implementation science research funded by the National Institutes of Health (NIH) to address the goals of the EHE initiative

**Key goals:**
- Synthesize findings across the NIH EHE research portfolio
- Accelerate dissemination of findings and best practices to federal and local implementing partners

**Standalone funding opportunity not connected to the CFARs/ARCs**

**Primary focus/priority will be on projects that receive direct EHE funding. However, we anticipate could potentially provide resources and networking opportunities for EHE-related projects**
