

INVERSE PROBABILITY OF TREATMENT WEIGHTING FOR CONTROL OF CONFOUNDING

Ryan Cook

Dept of Epidemiology, Fielding School of Public Health

April 30th, 2019

12-1 PM | MRL 1-441

A light lunch will be provided

This is a one-hour introductory workshop on the use of inverse probability of treatment weighting for control of confounding in observational studies. Participants will learn why IPTW works and how to apply it in their own research.
