Diseases, Office of AIDS

Ending the Epidemics

# 2016: Integrated HIV Surveillance, Prevention and Care Plan

## **Four** Goals

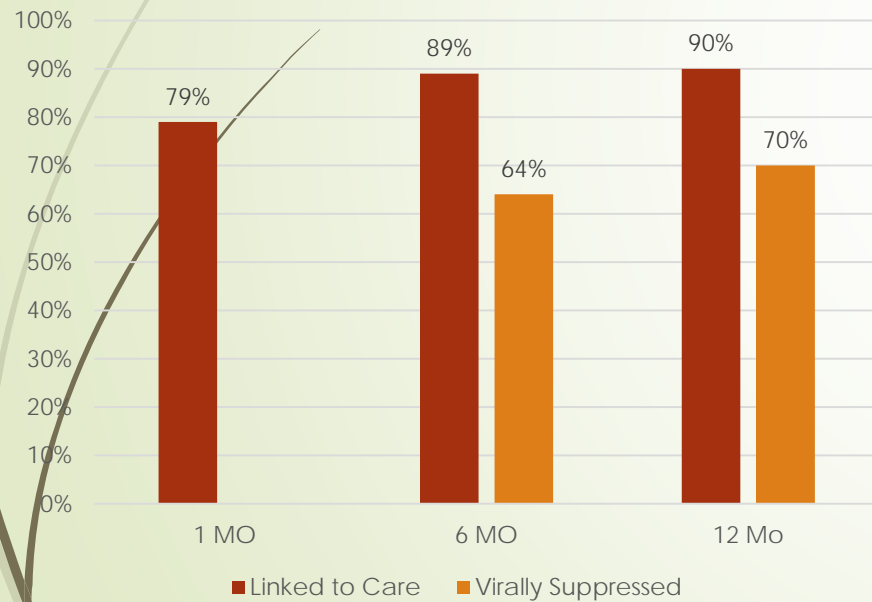

- 1** - Reducing New HIV Infections in California;
  - 2** - Increasing Access to Care and Improving Health Outcomes for PLWH in California;
  - 3** - Reducing HIV-Related Disparities and Health Inequities in California; and
  - 4** - Achieving a More Coordinated Statewide Response to the HIV Epidemic.
- 

# 2018 California Viral Suppression Rate: 64.2%

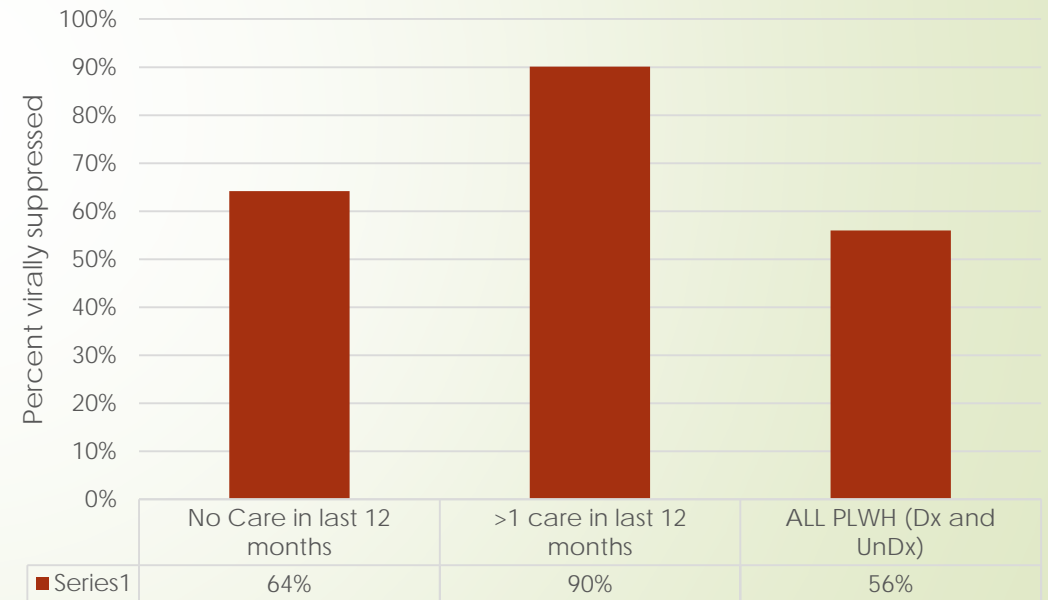

OBJECTIVE 7: Increase the percentage of Californians newly diagnosed with HIV who are virally suppressed within six months of diagnosis to at least 75 percent

OBJECTIVE 8: Increase the percentage of All Californians with diagnosed HIV infection who are virally suppressed to at least 80 percent

2018 Newly Diagnosed PLWH

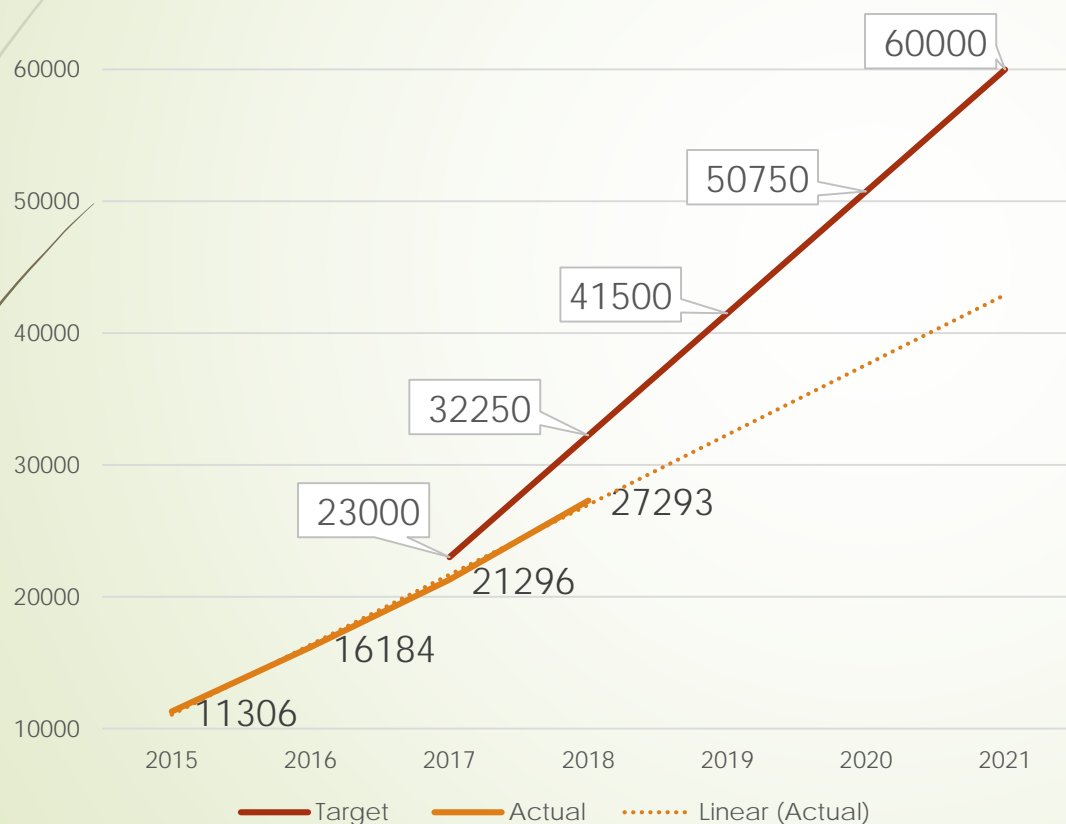

Comparison of Viral Suppression Rates

# PrEP

PrEP Uptake in California, and targets through 2021

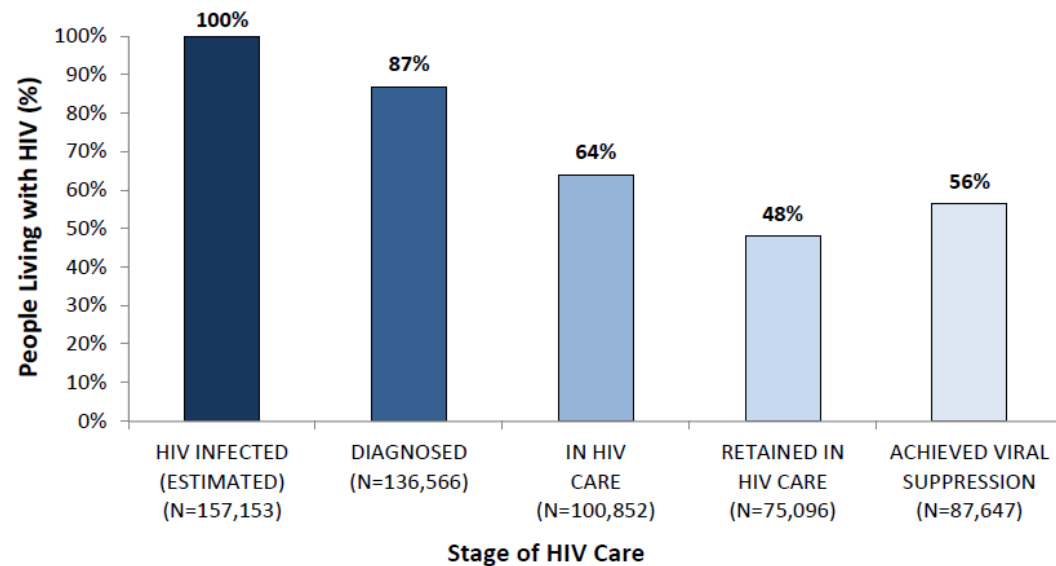

## Office of AIDS Efforts to Increase PrEP Uptake

- PrEP Assistance Program
- Telehealth contracted PrEP Provider
- New PrEP Team in ADAP
- ADAP / PrEP Enrollment workers
- Fund PrEP Navigation Programs

# Increasing Access to Care and Improving Health Outcomes

Figure 1. The Overall Continuum of HIV Care: All Persons Living with HIV Infection — California, 2018

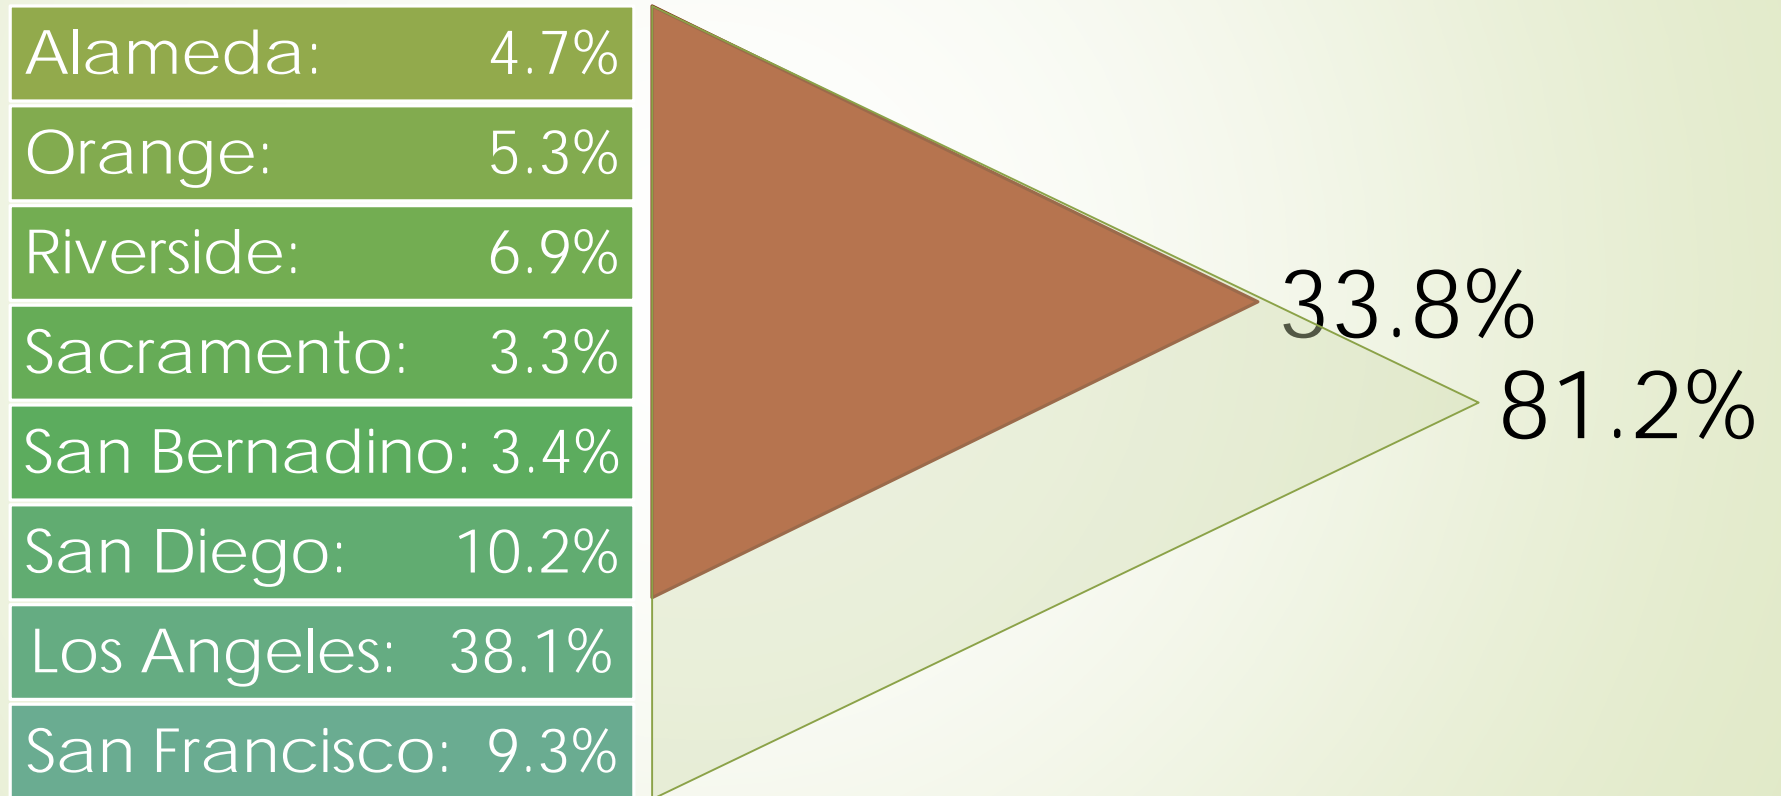

- Between those who are infected and undiagnosed, and those tested but not in care or fallen out of care, 52% of PLWH need assistance in accessing and sustaining care
  - Data to Care using Surveillance information, LISA post-COVID
  - Outreach and screening all RW clients regarding last medical visit and next medical visit
  - Increased collaboration between non-RW providers and patient navigators

Improving Health Outcomes Through a Clinical Quality Assurance Program for Care and ADAP, and by Monitoring HIV Care Performance Measures

# Federal Dashboard Stats for California

	2017 Baseline	2018	2019 <i>Preliminary</i>	2019 Q3
Incidence	4,800	4,600		
Knowledge of Status	87.0%	87.1%		
Diagnoses	4,878	4,712	3,529	
Linkage to HIV Medical Care	74.3%	79.5%		83.5%
Viral Suppression	66.7%	66.9%		
PrEP Coverage	15.9%	22.1%		

# California Consortium for Ending the HIV Epidemic in America (EtHE)

A More Coordinated Statewide Response

# ENDING THE EPIDEMICS (ETE) STRATEGIC PLAN

- ▶ **IT'S TIME TO ADDRESS THE SYNDEMIC OF HIV, STDS AND HCV**
    - ▶ Common set of communities impacted most by HIV, STDs, and HCV
    - ▶ Similar behavioral acquisition, disparities, and social determinants of health
  - ▶ **COMPREHENSIVE SCREENING IS IMPERATIVE**
    - ▶ At the start of the AIDS Epidemic, treating HIV distinctly was critical due to the discrimination, fear, and social consequences
    - ▶ To only test for HIV, or STDs or HCV misses the opportunity to identify co-infections
    - ▶ Lab platforms enable testing for all three infections simply
  - ▶ **ADDRESSING ALL THREE INFECTIONS CAN LEVERAGING ADDITIONAL FUNDING FOR SCREENING AND TREATMENT OF THESE INFECTIONS THAT HAVE SIGNIFICANT CONSEQUENCES ON VULNERABLE POPULATIONS**
- 

THANK YOU FOR YOUR WORK  
TO END THE EPIDEMICS

**QUESTIONS???**

# ALAMEDA

ENDING THE HIV EPIDEMIC IN AMERICA PS20-2010 ACTIVITIES

---

EtHE Coordinator: Steven Gibson [Steven.Gibson@acgov.org](mailto:Steven.Gibson@acgov.org)

# PRIORITY POPULATIONS

Critical voices; Critical focus for EtHE

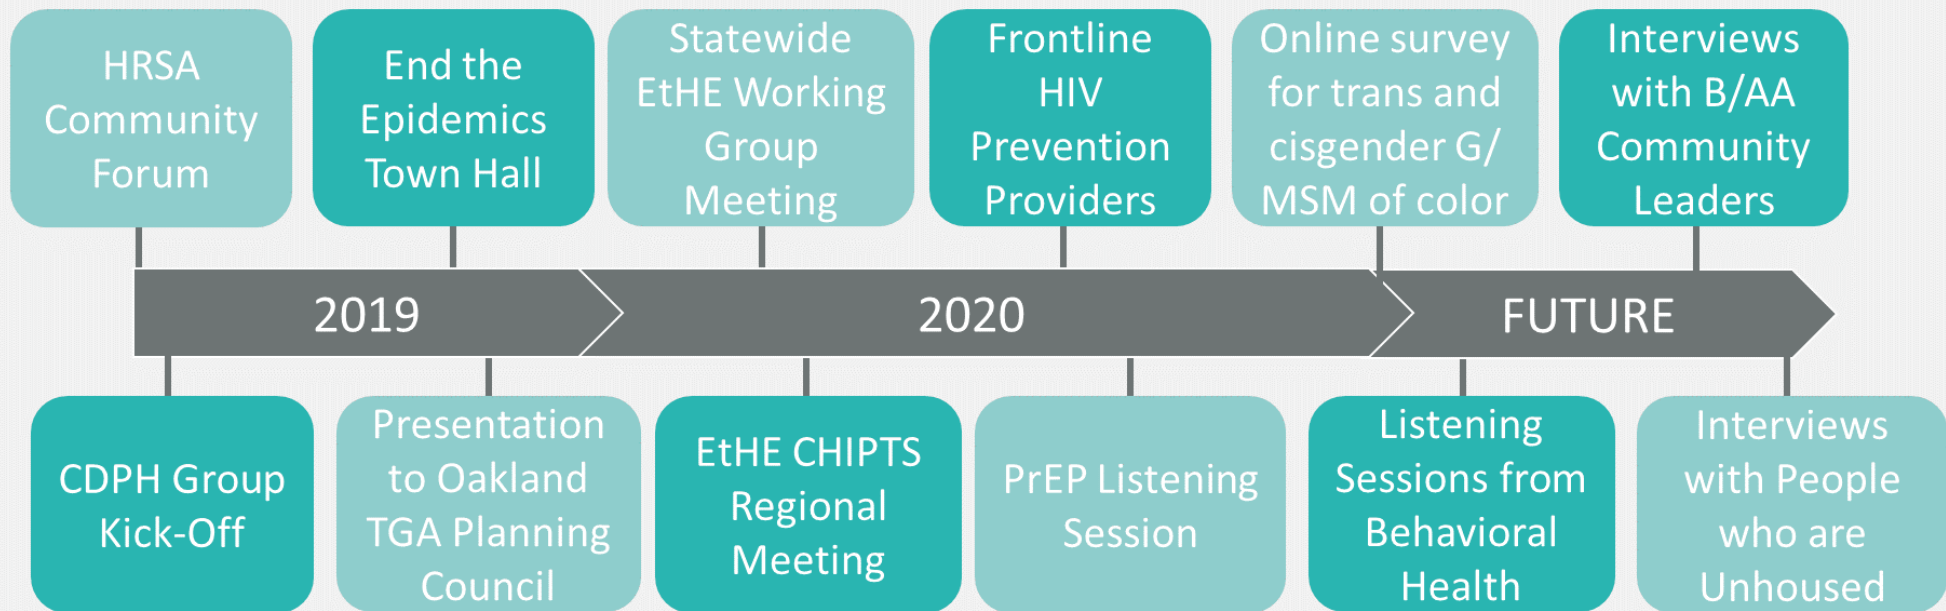

- B/AA and Latinx MSM
- Young MSM of color (30 and younger)
- Transgender people
- PrEP eligible women

# CDC PS20-2020 EtHE ACTIVITIES

---

- **HIV testing, including routine opt-out testing (ROOT) in healthcare settings and testing outside of clinical settings (self-testing)**
- **Expanded Data-to-care/Data-to-PrEP**
- **Same-day PrEP for Alameda County priority populations**
- **Gay/MSM STD/PrEP linkage**

# ENDING THE HIV EPIDEMIC ACTIVITIES
