Started in January of 2021 with the aim of supporting the work of CBOs and CHOs who were trying to increase equitable access to vaccine. We have recently transitioned to a 501c3 to be able to expand and continue our work with the neighbors with ongoing and systemic barriers to access.

600 active and trained volunteers, and all materials and resources are available for the public, so folks can use them in their own networks without joining us.

Pivoted to doing outreach and staffing of mobile clinics in partnership with Kedren Vaccines (and other community health orgs) and HACLA.

Our model of complete care translates well to in-person outreach, education, and mobile clinics.

We are a volunteer-run collective that seeks to remedy a specific and pernicious harm—there are barriers to vaccine access in the communities that have been hardest hit by COVID-19.
