Porter DeLaney founded the Kyle House Group in 2010 after more than a decade of senior-level work in the political and international relations spheres. Over the last 15 years, Porter has served as a senior advisor and strategist to Bono and his organization ONE, and to the Bill and Melinda Gates Foundation, among other global development leaders.

Porter has been a chief architect of lobbying and advocacy campaigns that resulted in multi-billion dollar funding increases for U.S. development assistance programs, and the bipartisan passage and signing into law of major development legislation. Porter also has advised a number of Fortune 500 companies on their corporate social responsibility programs around the globe.

The Kyle House Group advises and represents a number of leading foundations, NGOs and international organizations in the global development sector, including the Bill & Melinda Gates Foundation, the UN Foundation, and leading international NGOs such as CARE, PATH, and Bread for the World. Specifically, KHG leads advocacy and outreach campaigns on topics including economic development, malaria, vaccines, clean water, agriculture development and nutrition, maternal and child health, international conservation, environmental policy, and aid effectiveness. KHG also represents and advises a number of leading multinational companies on their global corporate responsibility strategies and programs.
