# What is the NIH Public Access Policy?

---

The NIH Public Access Policy ensures the public has access to the published results of NIH funded research to help advance science and human health. The Policy has three aims:

- **ARCHIVE.** A central collection of NIH-funded research publications preserves vital published research findings for years to come.
- **ADVANCE.** The archive is an information resource for scientists to research publications and for NIH to manage better its entire research investment.
- **ACCESS.** The archive makes available to the public research publications resulting from NIH-funded research.

# What is the NIH Public Access Policy?

---

Requires scientists to submit final peer-reviewed journal manuscripts that arise from NIH funds to PubMed Central (PMC)

Maximum 12-month embargo

Enforcement:

- Anyone submitting an application, proposal or report to the NIH must include the PMC reference number (**PMCID**) when citing applicable papers that they author or that arise from their NIH-funded research.
- NIH will delay processing of non-competing continuation grant awards if publications arising from that award are not in compliance with the NIH public access policy. **The award will not be processed until recipients have demonstrated compliance.**

# What is PubMed Central?

Abstract

Send to:

Am J Mens Health. 2012 May;6(3):194-210. doi: 10.1177/1557988311424072. Epub 2011 Nov 21.

### Depression over the adult life course for African American men: toward a framework for research and practice.

Watkins DC<sup>1</sup>.

#### Author information

#### Abstract

Rarely are within-group differences among African American men explored in the context of mental health and well-being. Though current conceptual and empirical studies on depression among African American men exists, these studies do not offer a framework that considers how this disorder manifests over the adult life course for African American men. The purpose of this article is to examine the use of an adult life course perspective in understanding the complexity of depression for African American men. The proposed framework underscores six social determinants of depression (socioeconomic status, stressors, racial and masculine identity, kinship and social support, self-esteem and mastery, and access to quality health care) to initiate dialogue about the risk and protective factors that initiate, prolong, and exacerbate depression for African American men. The framework presented here is meant to stimulate discussion about the social determinants that influence depression for African American men to and through adulthood. Implications for the utility and applicability of the framework for researchers and health professionals who work with African American men are discussed.

Author Manuscript

# Get your paper into PMC

---

There are 4 ways that a paper can be added to PubMed Central and become compliant.

- Helpfully called Methods A, B, C, and D

Methods A and B – publisher does all the work

Methods C and D – author does most/all of the work

- Methods C and D involve the use of a system called NIHMS: the NIH Manuscript Submission System

# Method A

---

Method A journals take care of the compliance process for their authors

They put all their NIH-funded articles in PMC automatically

It is a limited [list of journals](#)

# Method B

---

Method B publishers take care of the compliance process for their authors, **IF the authors opted in** at the time of publication, usually paying an open access fee

It is a limited list of journals/publishers that participate

# Method C

---

If you did not pay an open access fee/article processing charge to publish your article, chances are you will need to do Method C.

You will need a few things to deposit:

- Your [eRA Commons](#) username and password (they make you change passwords often so you may have to reset)
- The **final author version of your manuscript**
  - NOT the published PDF
  - This is probably your last Word file before you sent it off to journal for the final time
- Don't forget any supplemental files/tables/figures/etc.

Go to the NIH Manuscript Submission System

- <https://www.nihms.nih.gov>

# NIH Manuscript Submission System

The NIH Manuscript Submission (NIHMS) system supports the deposit of manuscripts into PubMed Central (PMC) as required by the public access policies of NIH and other participating funders. Learn more about the [NIHMS process](#).

# Now what?

---

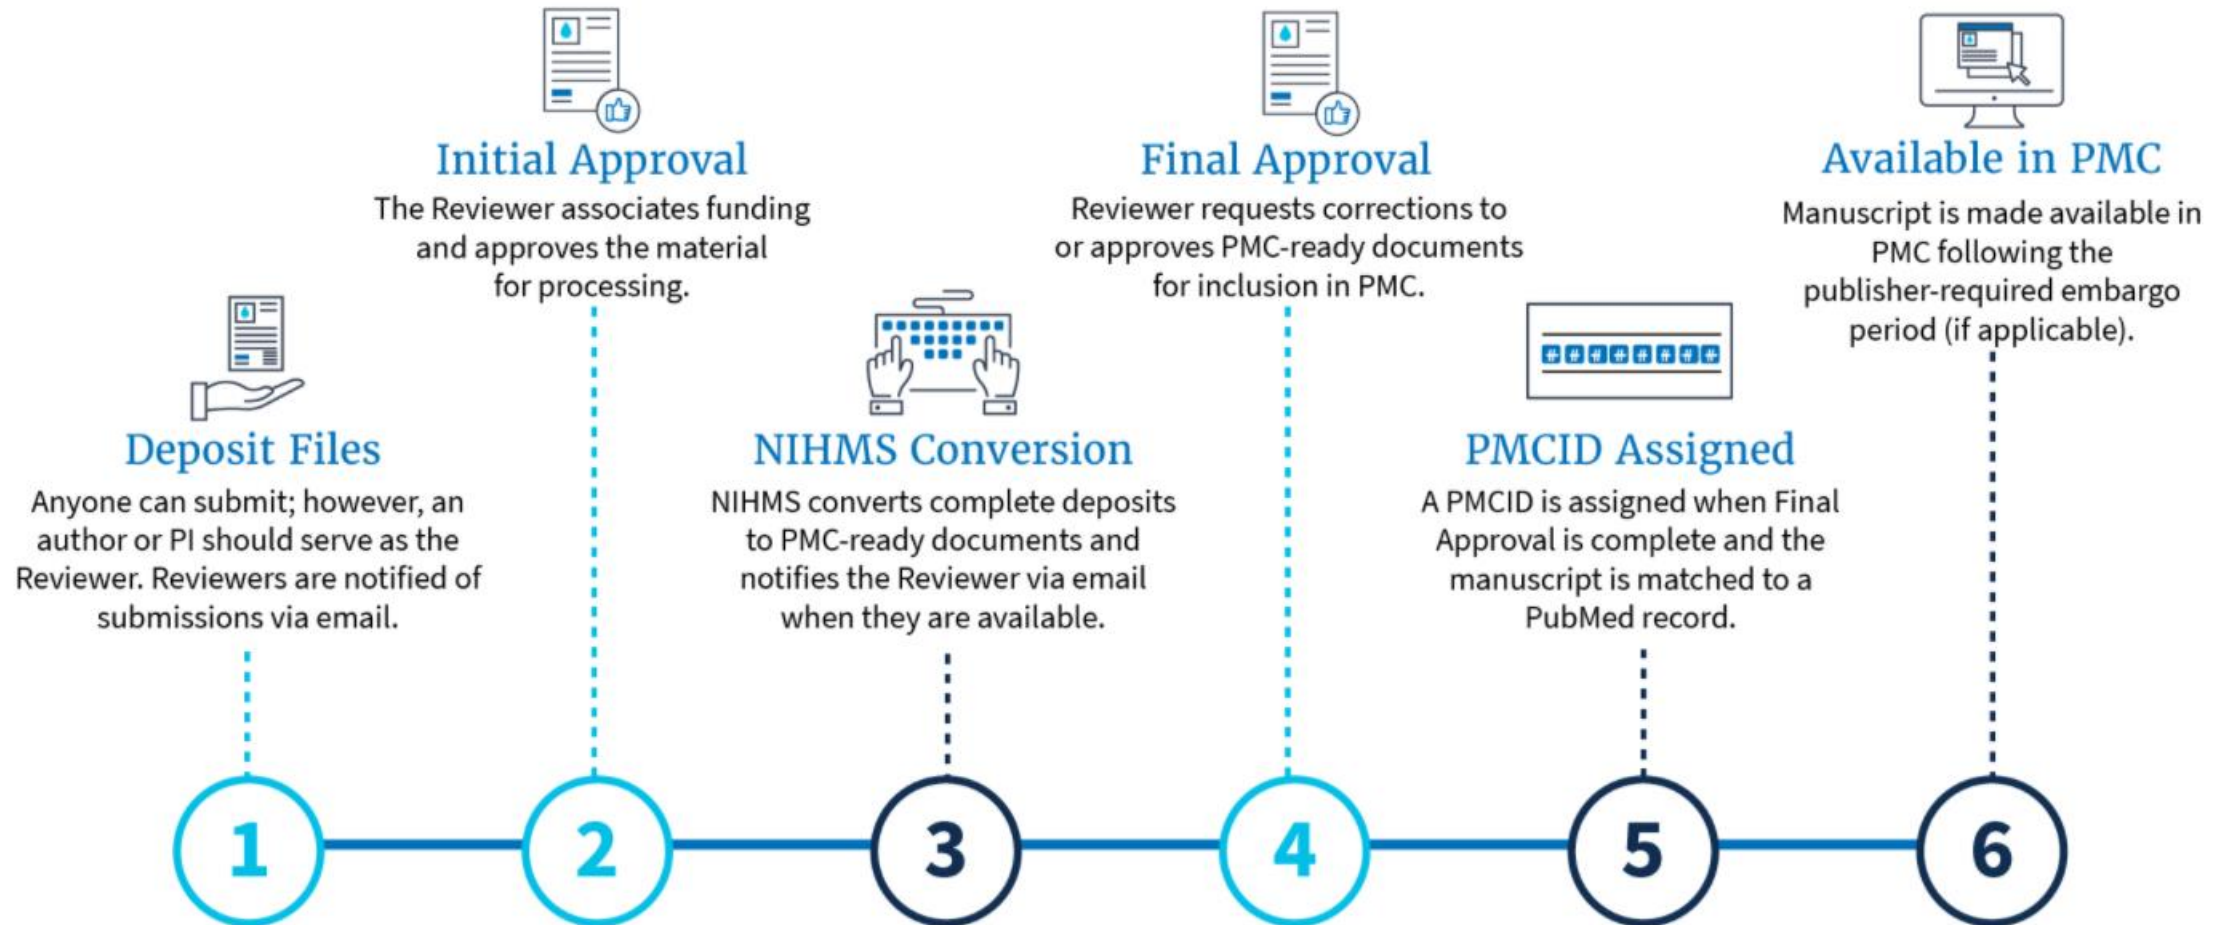

It will take NCBI a period of time to work on your manuscript and convert it to PMC format

During this period of time, your submitted manuscript has an interim ID number: the NIHMSID

Then you will get an email notifying you that they need your final approval

- Click the link in the email
- If you lose the email, just log back into NIHMS and you'll see the manuscript that needs your attention on your dashboard
- Double check the converted manuscript to make sure it's correct

You only get a PMCID after you do final approval

# What could go wrong?

---

You may get other messages from NCBI

- If you are missing tables/figures, etc

If so, log into NIHMS to make any corrections or updates

# Method D

---

Some publishers let you skip the first step of uploading your final author manuscript into NIHMS

This is usually an option at the time you're submitting your manuscript

You still have to log into NIHMS to approve the files that the publisher uploads

<p><b>Funding Body Archiving Mandates *</b></p> <p>?</p>	<p>Nature Publishing Group encourages the authors of all original research papers to self-archive the final author version (the author's accepted version of their manuscript) with a release date of 6 months post-publication. This is compliant with all major funders' access policies and mandates. With your authorization, NPG can deposit manuscripts in PubMed Central, Europe PubMed Central and PubMed Central Canada on your behalf. We encourage you to take advantage of this service if you or any of your co-authors are funded by an agency requiring self-archiving. Please select from the following options:</p> <p><input type="radio"/> If this manuscript is accepted for publication, please archive it on behalf of the authors. By choosing this option, I authorise NPG to transmit information to the archive I specify.</p> <p><input checked="" type="radio"/> I do not wish NPG to archive this manuscript if accepted, or this service is not applicable to me and my co-authors. If my or my co-authors' funder mandates self-archiving, I understand that it is my responsibility to archive in accordance with its policies.</p> <p><b>If you have already uploaded your funding information for this manuscript and wish to make any change, please click <a href="#">here</a>.</b></p>
