

# HIV GRAND ROUNDS

## *"Optimizing PrEP Uptake Among Youth in Los Angeles and New Orleans via Telehealth Coaching, Online Peer Support and Automated Texting: Results from ATN 149"*

This lecture will present results from ATN 149 randomized controlled factorial trial demonstrating improved PrEP uptake and sustained engagement in support services utilization over 24 months follow-up in a cohort of 895 sexual and gender minority youth. Status neutral evidence-based intervention elements designed to be adaptable and implementable by frontline HIV prevention organizations and staff will be described. Presentation will also describe social determinants of health and PrEP barriers over time.

### Event Information

- Virtual lecture
- Once you register, you will be emailed a Zoom link
