

PEP QUESTIONS

We've been talking a lot about antiretroviral therapies used to treat HIV/AIDS.

1. Have you heard of these drugs being used by HIV-negative people who think they may have recently been exposed to HIV? Some people call this "PEP" (or, Post-Exposure Prevention) or the AIDS "morning after pill" to prevent HIV infection. Have you heard of that?

No.....1 **[SKIP TO NEXT SECTION]**
Yes.....2

I am going to refer to this use of the drugs as "PEP." Now, I am going to ask you some questions about PEP.

2. Have you ever shared your antiretroviral medications with anyone for PEP (that is to help prevent HIV infection)?

No.....1
Yes.....2

For the following questions, when I say "unprotected sex," I mean "sex without a condom."
[SHOW HAND CARD #6]

Less likely 1
A little less likely 2
No effect on my behavior... 3
A little more likely 4
More likely 5
I don't do that 7

3. Has knowing about PEP made you more or less likely to.....

a) have unprotected vaginal or anal sex ? 1 2 3 4 5 7
b) borrow or lend needles for injecting drugs? 1 2 3 4 5 7
c) ask about a partner's HIV status? 1 2 3 4 5 7
d) worry about condom breakage? 1 2 3 4 5 7
