CPR Training Marathon

FREE

The life you save with CPR is most likely to be the life of a loved one.

4 out of 5 cardiac arrests events happen at home

Statistically speaking, if called on to perform CPR, the life you save will probably be someone at home (child, spouse, parent, friend)

Sudden cardiac arrest can happen to anyone at any time and is a leading cause of death in the U.S. With proper CPR training, the chance of survival more than doubles
